

Amendments to the Specification

Please replace the paragraph on page 20, line 25 to page 21, line 2 with the following amended paragraph:

In the particular embodiment shown in Fig. 6 a Go button 603 is provided for the user to initiate a search of data stored about users following the criteria entered in box 601. Once a user enters the criteria and selects Go, the query goes to server 109 in this embodiment, which initiates a search of data in repository 114 and returns users 604 that match the criteria in the search. Many sorts of databases and search functionality are known in the art which might be employed in a system according to this and other embodiments of the invention.
